Summary

Final-year B.Tech student in Artificial Intelligence and Machine Learning with a strong foundation in machine learning and deep learning. Experienced in developing machine learning applications using Python, including data preprocessing, model development, and model evaluation. Seeking a Machine Learning Engineer internship or entry-level role.

Education

Bachelor of Technology in Artificial Intelligence and Machine Learning

Brainware University, West Bengal

2023 – 2027

SGPA: 8.80/10

Higher Secondary (Class XII)

Lakshya High School (H.S), West Bengal

2023

Technical Skills

Programming Languages: Python, SQL, Java, C

Machine Learning: Scikit-learn, Optuna

Deep Learning: PyTorch

Natural Language Processing: NLTK, spaCy, LangChain

Backend Development: FastAPI

Data Analysis & Visualization: NumPy, Pandas, Matplotlib, Seaborn

Databases: PostgreSQL

Developer Tools: Git, GitHub, Docker, Jupyter Notebook, Google Colab, VS Code, Streamlit

Projects

Enterprise Contract Intelligence Platform

[GitHub Repo](#)

PyTorch, Hugging Face, FastAPI, PostgreSQL, FAISS, Streamlit

- Developed an AI-powered contract intelligence platform using NLP, Document AI, and Retrieval-Augmented Generation (RAG).
- Built document processing pipelines for OCR, semantic search, information extraction, and contract clause analysis.
- Designed REST APIs with FastAPI and integrated PostgreSQL with FAISS for intelligent document retrieval.

Enterprise Decision Optimization Engine

[GitHub Repo](#)

Python, Scikit-learn, Optuna, FastAPI, PostgreSQL, Streamlit

- Developed an enterprise decision optimization platform integrating machine learning and mathematical optimization.
- Built end-to-end ML pipelines for data preprocessing, feature engineering, model training, evaluation, and hyperparameter optimization.
- Designed REST APIs and a modular backend architecture using FastAPI and PostgreSQL.

Financial Risk Intelligence System

[GitHub Repo](#)

Python, Scikit-learn, XGBoost, Optuna, FastAPI, PostgreSQL

- Developed a financial risk intelligence platform for predictive risk assessment and intelligent decision support.
- Built machine learning pipelines for feature engineering, risk prediction, model evaluation, and model explainability.
- Designed scalable REST APIs using FastAPI with PostgreSQL for enterprise financial analytics.

Cyber Threat Intelligence Platform

[GitHub Repo](#)

PyTorch, Hugging Face, FastAPI, Neo4j, PostgreSQL

- Developed an AI-powered cyber threat intelligence platform for automated threat analysis and cybersecurity knowledge extraction.
- Built NLP pipelines for threat intelligence, entity recognition, IOC extraction, semantic search, and threat correlation.
- Designed REST APIs with FastAPI and integrated Neo4j with PostgreSQL for knowledge graph management.

Training

AI / Machine Learning Trainee

Sep 2025 – Nov 2025

Samsung Innovation Campus @ Brainware University, Barasat, West Bengal

- Built and evaluated machine learning models using Python and Scikit-learn
- Applied data preprocessing, feature engineering, and train-test split techniques
- Improved model performance using validation methods and error analysis

Certifications

- Samsung Innovation Campus – AI / Machine Learning Training
- Fly Smart: AI Drone Innovation Camp
